### EXPERIENCE

Technical Lead / Sr. Full Stack Web Developer

12/2024 - Present

Intalio | Remote

- **Lead Developer** for "CTS," a microservices-based enterprise workflow multi-tenant SaaS platform centralizing official communications.
- Designed complex domains using **Spring Boot, JPA, and Hibernate**.
- Developed a **multi-database strategy** (Oracle/MSSQL/PostgreSQL) to keep a single codebase portable across enterprise clients.
- Built dynamic UI form builders & Workflows using **Composition API & Vuex**.

Sr. Full Stack Web Developer

04/2024 - 10/2024

Teamwill | Fintech

- Developed RESTful APIs using **Java 22** for car & equipment financing applications.
- Integrated **Camunda BPM** to automate process workflows for leasing operations.
- Managed PostgreSQL database design, query optimization, & performance tuning.

Sr. Full Stack Web Developer

05/2022 - 04/2024

Talys Consulting

- Designed the architecture for multiple modules of a data flow manager multi-tenant SaaS application.
- Supervised a team of junior developers and mentored 7 interns.
- Configured **Jenkins** and **Docker** pipelines for deployment on Linux servers.

Full Stack Web Developer

06/2021 - 04/2022

Almaviva S.p.A

- Built a visa processing CRM for the Italian Embassy scaled across 4 countries.
- Developed real-time notification channels using **WebSockets (sock.js)**.
- Optimized performance via **Spring Cache** & integrated 3rd-tier payment gateways.

Back End Java Developer

11/2019 - 10/2020

BFI | Tunis, Tunisia

- Implemented IFRS reprocessing modules for a financial-accounting platform used by banks in 15+ African countries.
- Analyzed and transformed data from Informix, MS SQL Server, and Excel; optimized SQL/DB queries and built ESB integrations across systems of record.
- Supported production clients (including Gabon, Benin, and Ivory Coast), documented transformation flows, and executed end-to-end testing/debugging.

Android Developer (End of Study Internship)

02/2019 - 09/2020

Advancia IT System | Tunis, Tunisia

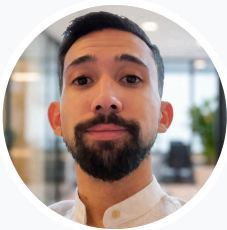

- Built an Android monitoring app from scratch and integrated Zabbix APIs via a Node.js backend for real-time infrastructure metrics and alerts.
- Delivered testing/debugging, version control, and backend API deployment.
- Provisioned and operated Azure infrastructure using Terraform, including cloud administration and runtime support.

### EDUCATION

Bachelor's Degree in Computer Science

2016 - 2019

Time University - Tunisia

### SUMMARY

Senior Full Stack Software Developer with 7+ years of experience delivering large-scale, enterprise-grade systems across fintech and government domains. Expert in Java/Spring Boot and modern JavaScript frameworks with a track record of modernizing legacy platforms and leading technical teams.

### KEY ACHIEVEMENTS

- 🗄️ **Multi-DB Portability**  
Created a unified codebase compatible with Oracle, MSSQL, and PostgreSQL.
- 🔗 **Workflow Digitization**  
Built a metadata-driven form engine reducing process deployment time.
- 👥 **Mentorship**  
Successfully mentored 7+ junior developers and interns.
- ⚡ **Performance**  
Optimized database queries and caching to improve load times by 40%.
